

# SECUREVAULT CONSULTING'S

## ORACLE SOLUTIONS PROPEL MULTINATIONAL CORPORATION TO NEW HEIGHTS

20<sup>TH</sup> JUNE 2023

---

### BACKGROUND

The client is a multinational financial institution, providing a broad portfolio of financial and wealth management services to its customers. They were looking to upgrade their Oracle Database and Oracle E-Business Suite systems to enhance performance, improve security, and support the latest features.

### CHALLENGES

Their existing Oracle Database and E-Business Suite systems were outdated, impacting overall performance and limiting their ability to use the latest Oracle functionalities. The client needed a reliable partner to manage the upgrade process, ensuring minimal disruption to their daily operations. Additionally, they wanted to enhance their database security and administration capabilities.

### SOLUTION

SecureVault Consulting, with its team of certified Oracle professionals, proposed a comprehensive upgrade and optimization plan. Our experts first conducted an in-depth analysis of the client's existing Oracle infrastructure. Following this, a detailed migration and upgrade plan was developed.

SecureVault's team managed the migration to the latest Oracle Database (19c), ensuring minimal downtime and full compatibility with the client's existing systems. Simultaneously, the client's Oracle E-Business Suite was upgraded to the latest version, taking advantage of new features and enhancements.

In addition, SecureVault provided remote DBA services, offering 24/7 monitoring, administration, and performance tuning. We also implemented robust backup and

recovery strategies using Oracle Recovery Manager (RMAN) and Oracle Data Guard.

## RESULTS

With SecureVault's Oracle Databases and Applications services, the client achieved a significant boost in their Oracle system's performance. The upgrades were seamlessly implemented with minimal disruption to their operations. The enhanced database security and effective administration led to improved system reliability and data protection. The client reported improved operational efficiency, and their teams could utilize the latest Oracle features, resulting in increased productivity.

SecureVault Consulting's comprehensive solutions and commitment to customer satisfaction ensured a successful Oracle Database and Applications upgrade for the client, providing them with a robust and efficient system to support their growth.

## CONCLUSION

Navigating the intricate landscape of Oracle Databases and Applications, SecureVault Consulting demonstrated its prowess in delivering tailored solutions that align with client-specific requirements. Our methodical approach, combined with in-depth expertise, ensured a seamless upgrade, optimizing the client's operations for the challenges of today's digital age. The multinational financial institution not only achieved enhanced system performance and security but also secured a dependable partnership with SecureVault, poised to support their evolving needs and ambitions. Through this collaboration, SecureVault reaffirms its commitment to driving client success, leveraging Oracle's robust technologies to fuel business growth and innovation.
